

Professional, secure and easy to use file sharing

January 2024

## About Maytech

Maytech provide a global cloud platform for secure and reliable file transfer and data acquisition for enterprises.

### What we do

Maytech's secure cloud data transfer and online file storage platform helps companies centralise and control file sharing from anywhere.

### How we do it

Our products feature enhanced security and compliance with full audit trails and are customisable for manual or automated workflows.

### Why choose us

We're ISO 27001 certified and trusted by leading global companies. Our dedicated team will work with you and support you 24/7.

For more information see [www.maytech.net](http://www.maytech.net)

## Use cases

### SFTP Hosting

Looking to free up IT resources, lower operational and capital costs and increase productivity? Our secure managed SFTP hosting service allows you to quickly transfer large data files locally and globally – including to destinations such as China, the Middle East and Australia.

### Professional File Sharing

Consumer-grade services such as Hightail, WeTransfer or Dropbox lack central administrative controls and comprehensive audit trails causing IT headaches. Maytech deploy sophisticated data security measures to give your organisation greater control and allow you greater peace of mind.

### File Sharing to China

If you need reliable and fast large file exchange to and from China when many lesser services simply don't work, we can help. Our managed file transfer solutions accelerate data delivery by up to 40 times compared with direct downloads from the US or Europe.

For more information see [www.maytech.net](http://www.maytech.net)

## Use cases

### PCI Compliant Data Transfer

Businesses accepting credit cards must store, process and transmit the information securely through a PCI compliant network. Let Maytech help you meet and exceed your PCI compliant data transfer requirements against global privacy and security standards, including PCI and HIPAA. We test these daily with McAfee Secure.

### Large File Transfer

Our managed platform boasts the most competitive data transfer rates for challenging files or data delivery of any cloud provider. Whether your project involves HD movie transfer, huge social data analytics profiling or broadcast news, our proprietary technology makes for uploads and downloads that are always local and fast.

### Data Acquisition

Bring a new efficiency to data acquisition. Whether you need secure solutions for automated workflows or specialised interactive data collection, our software empowers you to implement fast, ultra-secure practices within your organisation.

## Our three uniques

Both small businesses and large global corporations use Maytech's file sharing solutions for mission-critical workflows and secure global data distribution and acquisition services.

### Why do they do it? What makes Maytech stand out?

#### People

Maytech provides great customer service. It is why we outperform other larger companies and customers choose us over other solutions. Customers choose Maytech because of responsiveness and helpfulness. Every person has the ability to influence this, whether working in sales, support, marketing, development or system administration.

#### Easy to use

Maytech is easy to use, which enables quick and effective product evaluation. Having no complexity in the product reduces friction and increases user adoption.

#### Value for money

Maytech is competitively priced versus other file sharing solutions offering comparative security and compliance features.

## Quatrix widget

Quatrix Widget embeds a fast and secure file upload facility into your corporate website.

### How it works

#### STEP 1

User visits your website to upload files

#### STEP 2

User selects files for upload, a status bar provides progress feedback

#### STEP 3

You receive the files into your Quatrix Cloud

Or call us: International & UK +44 (0) 189 286 1222 | USA & Canada 1 800 592 1906

## Why Maytech products?

### Highly Secure

Approved for sharing Government, Medical and Financial data, security is a key feature of our service. It also reduces external firewall access to a single point of entry.

### Compliant

We regularly work with customers to meet stringent compliance requirements. Our products are PCI-DSS, HIPAA and GDPR compliant. Our ISMS is ISO 27001 certified.

### Fast

Using our uncongested global infrastructure provides a fast, reliable service and reduces the cost and time of building, maintaining and supporting internal infrastructure.

### Data Residency

Choose where your data is stored from any of our global data centre locations for transparent data residency and compliance.

### Automations

Build complex no-code automated workflows between Quatrix and major cloud services / internal applications, API and IPaaS connectors.

### Secure Data Acquisition

We work with companies such as insurers, retailers and print services, enabling our customers to securely collect end-user data fast and efficiently.
